# Blue And Yellow

Blue like the sky and yellow like the sun  
Blue for the pure mind and yellow for the jealous heart  
Blue when the breeze make the yellow flowers swim with  
Blue as the waves that grope on the yellow sand  
Those are my reasons for being them my favourite colors

# For Every Body

I want to yell  
I want every body listen  
I don't wanna anything from life  
Just freedom  
I want the whole word listen to my voice, my opinion  
I'm in jail  
Let me feel  
Love  
Happiness  
Get this chain from me  
Let me fly by my mind  
Is it wrong if I wanted to express what in my heart?  
I don't shy from any one  
I wanna take a chance  
I'm not going to live twice  
And for me  
Death is just the beginning  
Do what u want  
Cry and cry  
U'll feel release  
This is it  
The plan of my life

# Go To Hell

My eyes weeping  
But ur lips r sneering(how dare u?)  
u'r always messing with my feelings  
And the tears like rain on my cheeks  
I was for u only a feather  
u send it flying by the breeze  
u're only think about being sake  
But i only see fake  
u split my heart, i feel mad  
but i can hear the glee in ur voice  
u're pushing me to delude things  
while i'm in the board of depression  
it'll come a day  
and u'll wake-up  
the day u open the hell's door..

# Live Your Life

Let in your eyes a shining gleams  
Only for hope it seems  
Don't be shame  
And tell your name  
Look at the window  
To the world below  
But you have to know  
That people grow  
So, they'll miss the sun  
And search for fun  
Don't let happy gone  
Cause it never long  
And don't think at past  
Only for now at last  
Don't look to the back  
And remove the black  
For you, every thing is hazy  
It doesn't make you lazy  
Let your mind fly  
And forget about to cry  
Being tall  
Doesn't make you fall  
So, use your heart  
And be smart  
Don't be old  
Cause childhood like gold  
Don't use lie  
Just be a simple guy  
Make your life easy  
Cause no one's flimsy

# Pain Of Love

- It was in a dark night  
Under the moon light  
- We sat under the tree  
With glee  
- After we return back home on feet  
In the empty street  
- Then, every one on his way  
Preparing for a new day  
- But i searched for you in many places  
And it's still in my mind, only your face  
- I fall in love  
With a heart like Dove  
- But you din't care  
How you dare?  
- You ended our date  
With words full of hate  
- I give you my only secret  
And you din't keep it  
- That was bad  
Cause i felt so sad  
- I know, i came too late  
And i was locked, your heart's gate  
-You refuse me, i can't think why  
But where are you to say "good-bye"

# School

- School every morning  
And that's so boring  
- I hate School  
There are only rules  
- School every day  
No more play  
- In thoes places  
You find Sad faces  
- School is near  
Hope i'm not here  
- And we are  
Not far  
- Teachers are not cool  
And puples are fool  
- You'll stand in front of gate  
If you come late  
-So be a hero  
And take a zero

# Still Love U

We'll he care if he saw the tear in my eye  
We'll he wipe it and kiss my brow  
Or he'll just look at me and..go  
Leaving me in a big storm of ideas  
He din't understand yet that i do love him  
that his narrow mind drives me to crazy  
I can only hear promisses from every side  
But nothing come true, exept a broken heart  
I'm exhausted from all his rebellious word  
Like i'm with no honor or dignity  
I founded for him a home in my heart  
But he's refusing being a part of my soul..  
u should know: ' still love u'

## 'V' Love 'V'

U meet the girl  
And every day  
U look into her gleams eyes  
U listen carefully to her musical voice  
U smell her adorable perfume  
U touch her amazing skin  
Some day  
And after the dinner  
The moment u waited for  
U was confused about to refuse u  
U try to kiss her  
And she din't slaps u  
U feel that ur heart is going to explosive  
And U feel hot  
U r the most happy in the whole university  
That's love, Babe  
The greatest thing it happen for the person  
To be in love and get love in return
